Web Development		

Personal Projects

BookSpace :-

BookSpace is a full-featured **MERN** stack application designed for buying and managing books online. It includes secure user authentication, book browsing, ordering functionality, and a responsive UI built using **React**.

Key Features:-

- User Authentication (**JWT** + **bcrypt**)
- Book **CRUD** Operations (Create, Read, Update, Delete)
- Order Management System
- RESTful API using **Express** & **MongoDB**
- Role-based Access Control
- Fast, dynamic frontend using **React Router DOM**

Video Tutorial :-

A full-stack video tutorial platform designed for delivering educational content. It features an admin panel for managing videos and a user interface for browsing and interacting with video content.

Key Features:-

- User Authentication using **JWT** and **bcrypt** (Sign Up & Sign In)
- Admin Panel to securely add and manage tutorial videos
- Video Playback Interface for users to view uploaded tutorials
- Search Functionality to filter videos by keywords
- Like System allowing users to engage with content
- Clean, responsive, and user-friendly UI built with modern **React**
